

Daily Git Push & Pull Guide (For WSA Team)

1 Check your current status

```
git status
```

2 Pull latest code from GitHub

```
git pull origin main
```

3 Add updated files

```
git add .
```

or

```
git add filename
```

4 Commit your changes

```
git commit -m "your message"
```

5 Push your new code

```
git push
```

Extra Useful Commands

- If pull gives unrelated histories error:

```
git pull origin main --allow-unrelated-histories
```

- Force push if required (dangerous):

```
git push origin main --force
```
